

## Spirobank Smart

### App-Based Spirometer

The simplest device for **cost-effective spirometry**.

Real time test available on Smartphone via **Bluetooth Smart 4.0**

Ready to Connect: designed for **Remote Patient Monitoring, Homecare, Clinical Trials and 3rd party software integration**.

**Software Development Kit** for iOS and Android available for developers.

**Compatible mobile Apps** (MIR Spirobank and iSpirometry) available for iOS and Android with **Unlimited Online Free Updates**.

Since the beginning of the **COVID-19** emergency, people seldomly attend doctors' offices and avoid trips to the hospital whenever possible.

Now more than ever, there is a need of greater accessibility to tools that allow us to **personally assess our state of health** and, in particular respiratory function.
